

# AUTOARCHIVE FOR IFS APPLICATIONS

The best automation solution for archiving documents into IFS Document Management.

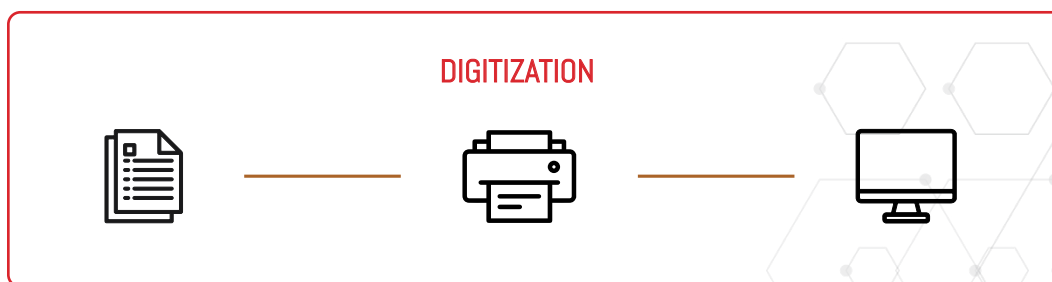

## AutoArchive for IFS Applications

- Replaces paper in your filing cabinets and creates a digital version inside IFS Applications for easy access. No more spending hours filing your paper and hours going back to find what you filed. Just place your documents on the scanner and let AutoArchive do the rest.
- Scans documents you would like to archive and attaches them using the right mouse button inside IFS Applications or with a barcode.
- Use the RMB where you want to attach the document inside IFS or extract metadata from a barcode when scanned. AutoArchive will classify, index and archive the document in IFS Document Management, including a clickable image of your document inside IFS Applications.
- Think of archiving Shop Orders, Customer Orders, Purchase Orders, Packing Slips, HR Documents and many more ...
- Supported IFS Applications Versions: **All**

## How will AutoArchive benefit you?

- Eliminate filing, storing and searching for documents.
- Deliver information to business process when needed.
- Regain valuable space with the elimination of filing cabinets.
- Add value to your business processes and workflows in many other ways:
  - Productivity
  - Visibility
  - Manageability
  - Auditability
  - Security

## AutoArchive for IFS Applications

"I would absolutely recommend AutoArchive. It saved us probably the equivalent of a half-time employee and we're not even done implementing it everywhere yet. You know the implementation went surprisingly well. I mean the Astra team did a great job for us and we find the product very economical."

- Alex Ivkovic, Director of IT CDF/Cheer Pack
