

## Do your critical business processes like Order-to-Cash and Procure-to-Pay need to be optimized with end-to-end visibility?

In the ever-expanding world of digital transformation, secure, reliable and efficient digital ecosystem integration is crucial for the long-term success of an enterprise.

It not only requires integration with internal dataflows, but also with external entities, like trading partners, applications, suppliers, customers, and third-party data service providers.

With thinning profit margins on one side and increasing volumes on the other, an optimized integration solution that will help you efficiently manage the everchanging ecosystem of suppliers, trading partners, customers etc. is critical.

In all these cases and many more, Astra Canyon Relier is a perfect solution for your Ecosystem Integration requirements and will help you gain faster end-to-end integration of workflows in IFS. It supports various EDI standards and communication protocols and can be deployed on-demand, on-premise or on any cloud.

## Key Features of Astra Canyon Relier

### Seamlessly Integrated with IFS

- Consolidate numerous IFS tasks into one simple workflow
- Process multiple IFS transactions in real-time, using IFS BizAPIs for seamless integration

### Real-Time Technical & Business Insights for Every Role

- View up-to-the-minute graphical displays of your EDI operations and key performance indicators
- Graphical UI and dashboards - built for maximum efficiency
- Receive instant error alerts and email notifications
- Define user-configurable alerts

### Single Platform for File, EDI and API-based Integration

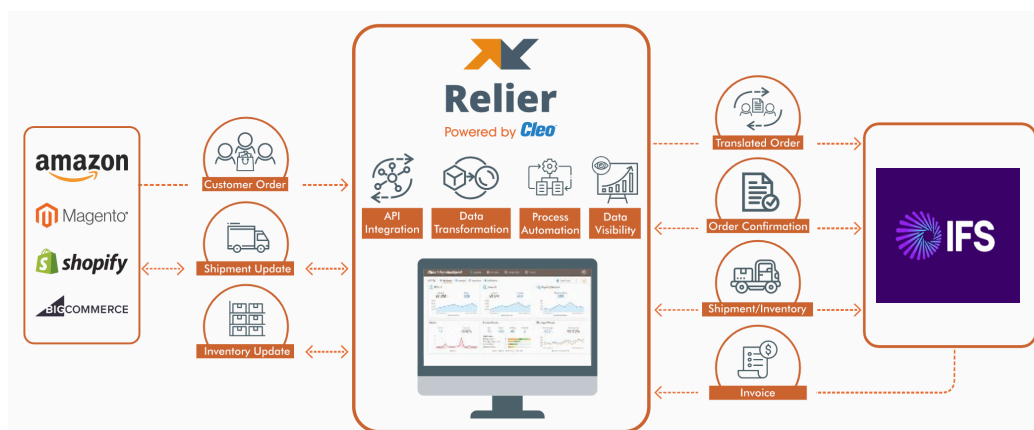

- Solve your integration challenges in a single platform
- Operationalize omnichannel revenue streams

### End-to-End Integration Process Visibility

- Visibility for key revenue driving business processes
- Seamless end-to-end process visibility
- Gain actionable intelligence in seconds

### Collaborative & Transparent Managed Services

- Tightly integrated EDI solution that productively manages the data exchanged with trading partners
- Eliminate manual entry and simplify inbound and outbound activities like customer orders, supplier invoices, ship notices, and purchase order releases
- Eliminate the black box brokerage model and reduce vendor dependency
- Gain unmatched transparency for glass box exception management
- Consolidate the full issue life cycle view and take direct action to increase agility and faster time to resolution

Seamless Ecosystem Integration Solutions for IFS Applications
